Experienced software engineer with a strong commitment to creating accessible web products. Proficient in a wide range of technologies, including JavaScript, Node, React, AWS and more. Skilled in developing user-friendly applications that meet both technical and accessibility standards.

Skills

- JavaScript, Typescript, HTML, CSS, jQuery
- MongoDB, PostgreSQL, Redis, RabbitMQ
- AWS, Digital Ocean, Docker, Linux
- Node.js, Express.js, Nest.js
- React, Next.js, Sass, Tailwind
- Git & Github, GitLab, Firebase

Experience

MAY 2023 – CURRENT - FULLTIME

Lead Engineer / Trusoft Limited

JULY 2022 – MARCH 2023

Backend Engineer /

- Actively engage in high-level meetings, leveraging technical expertise to influence technology-related discussions and offer valuable insights.
- Deliver high-quality, robust production code for diverse client projects, such as Cyberpay, Swiflink, Tos Funerals, Smart Deposit Scheme (SDS), and more.
- Oversee projects hosting and infrastructures, ensuring optimal server performance and reliability.
- Provide leadership within the engineering department by fostering collaboration, sharing knowledge, and mentoring team members.
- Collaborate with cross-functional teams, including designers, project managers, business analysts, and engineers, to translate creative concepts into real-world solutions for clients and stakeholders.

AUGUST 2021 – JUNE 2022 - FULLTIME

MERN Stack Developer / FoodTrain

- Designed and implemented a new UI interface for product software, accommodating additional features to target emerging markets.
- Sharpened debugging skills in collaborative sessions with senior developers and the CEO, expanding problem-solving approaches and expertise.
- Led the development of comprehensive technical documentation, incorporating Postman API blueprints and complex system architecture diagrams to boost team collaboration and streamline the development lifecycle.
- Actively pursued continuous professional growth through participation in webinars, conferences, and workshops, staying at the forefront of evolving technology trends.

APRIL 2021 – OCTOBER 2021 - CONTRACT

Frontend Developer / ProctorMe

- Leveraged React and Redux to meticulously design and construct reusable components, orchestrating efficient state management throughout the application.
- Fostered seamless collaboration with backend engineers to ensure smooth integration of frontend and backend components, optimizing overall system performance.
- Implemented responsive design principles to ensure optimal user experiences across various devices, enhancing accessibility and engagement.

Education

DECEMBER 2020

HND / Yaba College of Technology, Lagos
